Enterprise Systems:

Finacle Core Banking | Finacle Scripting | Banking Systems Support | Oracle SQL | Production Support | Incident Analysis & Resolution | User Acceptance Testing (UAT) | Production Deployment Support | CRM Support

Business Analysis:

Requirement Gathering | Business Process Analysis | Functional Documentation | Stakeholder Management | Root Cause Analysis | Problem Solving

Operations & Administration:

Process Improvement | Documentation Management | Inventory & Operational Reporting | Supplier Coordination | Data Validation | Cross-functional Collaboration

Key Professional Experience:

3+ years – Finacle Core Banking, Oracle SQL & Production Support

1+ year – Administrative Operations & Reporting (UAE)

4+ years – Enterprise Systems Development, Customization & Support

PROFESSIONAL EXPERIENCES

Administrative Assistant

EOC Medical Supplies, Dubai, UAE | Mar 2025 – June 2026

- Managed daily administrative operations, including invoices, delivery notes, purchase documentation, and inventory records, ensuring accurate and timely processing.
- Prepared and maintained operational reports using Microsoft Excel to support inventory tracking, procurement activities, and management decision-making.
- Coordinated with suppliers, freight forwarders, manufacturers, and internal departments to facilitate shipment processing and ensure timely order fulfillment.
- Maintained structured digital and physical documentation, ensuring data accuracy, completeness, and compliance with company procedures.
- Monitored inventory movements and assisted in resolving documentation discrepancies to improve operational efficiency.
- Collaborated with cross-functional teams to support daily business operations while maintaining high standards of accuracy, organization, and customer service.

Application Support Specialist (Finacle Core Banking)

H2 Software Consulting Services Inc., Philippines | Sep 2021 – Jan 2025

Client: Robinsons Bank (now part of Bank of the Philippine Islands)

Environment: Finacle Core Banking | Oracle SQL | CRM | MobaXterm | WinSCP

- Provided production support for the Finacle Core Banking System by investigating and resolving incidents reported by business users across loan, CRM, and core banking modules.
- Analyzed production issues using Oracle SQL to identify data discrepancies, perform root cause analysis, and recommend appropriate corrective actions.
- Investigated loan account interest calculation issues by identifying schedule date discrepancies and preparing controlled SQL data correction scripts for approved production implementation.

- Collaborated with business users to analyze application issues and provided functional guidance or documented resolution procedures for recurring incidents.
- Prepared controlled production data patches for approval and coordinated implementation with authorized production support teams following established change management procedures.
- Escalated complex application defects to Infosys Level 2 Support, providing detailed technical analysis, SQL findings, application logs, and supporting documentation.
- Enhanced and customized existing Finacle scripts for approved business requirements, including account creation restrictions, automated time-based sweeping, and motorcycle loan account creation. Conducted User Acceptance Testing (UAT) and participated in controlled production deployment of the implemented enhancements.
- Worked closely with developers, infrastructure teams, system administrators, and business stakeholders to maintain production stability and support continuous business operations.
- Supported loan demand processing through the Finacle front-end after validating successful correction of affected loan account records.
- Generated recurring operational reports including Daily Negative Future Balance extracts and Monthly SBA/TDA extracts.
- Supported GL Lifting requests and CIF Locate requests by coordinating with Data Center teams.

Analyst Designer

Fuji Xerox Document Management Solutions, Philippines | Jan 2015 – Jul 2018

- Processed structured data to compose standardized documents, ensuring accurate and consistent document generation.
- Analyzed requirements to identify and resolve data-related issues, supporting correct document composition and output quality.

SELECTED PROJECTS

Retail Sales Performance Analytics *(Source Code & Documentation Available on GitHub)*

Retail Sales Performance Analytics | SQL | Python | Power BI

- Designed and completed an end-to-end data analytics project using SQL, Python, Power BI, and Advanced Excel.
- Performed data cleaning, transformation, exploratory data analysis (EDA), and dimensional data modeling.
- Developed interactive dashboards and KPI reports to analyze sales performance, profitability, customer behavior, and regional trends.
- Applied business intelligence techniques to generate actionable insights and support data-driven decision-making.

E-Commerce Enterprise Analytics Platform *(In Progress)*

Enterprise Business Intelligence Platform | SQL | Python | Power BI | Data Modeling

- Developing an enterprise-scale analytics solution that simulates real-world business operations and decision support.
- Designing dimensional data models, ETL workflows, Star Schema, and business intelligence dashboards.
- Applying SQL, Power BI, and enterprise data architecture concepts to support operational reporting and executive decision-making.
